

Student's Personal report

on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Ausrine Kazlauskaite

Class: IIcg

Institute: Domeikavos gimnazija

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

The topic that I chose to talk is about soil, included soil degradation and the causes of soil infertility. I choose this topic because in my household, we grow our own vegetables, and it was quite interesting to learn more about soil how it has made and how important it is to us people.

Comment about the activity done at home (at least 300 characters)

Activities that are done in our household are the following: recycling, composting, using less plastic products, growing our own fruit and vegetables, so I used some practical previously mentioned ideas to prepare my presentations. I also analyzed and included some ideas, such as statistical data from the scientific articles.

Comment about the interactive activity in the classroom (at least 400 characters)

Activities that are done in my classroom are quite different from activities that are done in my household. Usually in classrooms, we talk about how we recycle, what we can do to reduce air and water pollution. This time I combined my previous knowledge with the scientific facts and prepared my presentation.
