

## Students' report Group 10 on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname: Mantas Nikolaitis, Gustas Trapeckas**

**Class: IIbg**

**Institute: Domeikavos gimnazija**

**Country: Lithuania**

**Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)**

The specific in-depth topic that has been chosen was soil and using potting soil in the garden. From our experience, we know that plants grow faster in potting soil. In addition, the plants grown in the potted soil are much healthier. Having some experience with the topic was the main factor why we chose it.

**Comment about the activity done at home (at least 300 characters)**

The activity was easy to do. Because every spring we help our parents to plant vegetables because we grow our own tomatoes and pickles in the greenhouse, so we knew what to do. We just need to add soil to the plants and that's all we did. Since we prepared the presentation as a group, we shared our responsibilities and included parts about previous personal experiences.

**Comment about the interactive activity in the classroom (at least 400 characters)**

The interactive activity in the classroom was very informative. Because we learned new things about soil by doing our presentation, also we learned things about soil, water, and sustainability from our classmates' presentations. The activity was fun, we really enjoyed everyone's presentations because they were unique since some of them did videos, others added voiceovers, and others read text from their slides. We also prepared a 5 questions quiz- Kahoot to see if our classmate's paid attention to the presentation and were very glad when our expectations came true.
