

## Students' report Group 12

### on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname: Haroldas Kisielius, Rokas Zubrus, Benas Kuizinas.**

**Class: 10b**

**Institute: Domeikavos Gimnazija**

**Country: Lithuania**

#### **Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)**

Our topic was about soil. In the presentation, we talked about soil, soil degradation, and soil erosion. The topic was chosen because it seems important to know what affects the soil. Especially the causes and effects of soil erosion. Some causes include climate change.

#### **Comment about the activity done at home (at least 300 characters)**

We gather information about soil, soil degradation, and soil erosion from google. In addition, we used it to make our presentation. We included diagrams and photos of soil to make it easy for others to understand what we were talking about. We only used facts and information that looked most interesting, informative, and important to us.

#### **Comment about the interactive activity in the classroom (at least 400 characters)**

In the classroom, we presented our presentation. All the photos, diagrams and facts seemed to catch people's attention and interest. To check what information they gathered from our presentation we made some questions to answer. Moreover, we saw that the majority of people answered right and that means our presentation caught people's interest and they listened to what we talked about. However, there were some wrong answers but, in the end, we are learning from our mistakes.
