

## Students' report Group 13 on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname: Rugilė Struoginytė, Paulina Kepežinskaitė**

**Class: IIbg**

**Institute: Domeikavos gimnazija**

**Country: Lithuania**

**Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)**

Topic that we were given was "Soil, water and sustainability" of which we choose to make a presentation about sustainability as it is, in our opinion, the most interesting and important out of the choices.

**Comment about the activity done at home (at least 300 characters)**

We started the process of making this project by splitting up our tasks. We decided to follow an informative video about our topic and I was given the task of making the questions and answers for the Kahoot game. Paulina was given the task of making the PowerPoint presentation, slides and including the video in it. Throughout the entire process, we kept in check with one another, making sure the other was doing their fair share.

**Comment about the interactive activity in the classroom (at least 400 characters)**

Although we presented our project later, we did enjoy what others choose to make the project about and how they went about it. Some students also made PowerPoint presentations and Kahoot games, others made fun and entertaining videos.
