

Students' report Group 16 on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Arnas Sabestinas & Mantvydas Tinteris

Class: IIcg

Institute: Domeikavos gimnazija

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

We decided to choose the topic of soil because we paid our attention to this topic completing the tests on Cielo platform, for instance, to the issue of soil contamination or the conversion of land into agricultural production. We also included deforestation because this issue is also very urgent and influences climate change.

Comment about the activity done at home (at least 300 characters)

At home, we tried to find the information online and from Cielo platform. We found a few videos and after the discussion, we chose the most interesting to show in the classroom. Then we prepared a few slides with the appropriate design for this topic. We also used the graph charts to reveal the situation in a clear way and finally prepared a Kahoot.

Comment about the interactive activity in the classroom (at least 400 characters)

In the classroom, we presented our project, which attracted the attention of all students. Everyone seemed very interested in our project and actively participated in the final part of our presentation when they had to answer Kahoot questions. Now we know more about this topic and hopefully, we helped other students to understand the topic better.
