

Students' report Group 18 on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Emilis Narbutas and Ugnius Smaidziunas

Class: IIag

Institute: Domeikavos Gimnazija

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

All topics that were suggested looked relevant because our society is beginning to understand the importance of environmental protection and the necessity to preserve natural resources such as soil and fresh water. Therefore, we decided to take the topic of water and tell other students about the importance of water to our humanity, and the ways to save water and prevent its pollution.

Comment about the activity done at home (at least 300 characters)

At home, we collected the information mostly using the internet resources, such as Wikipedia and YouTube. In the beginning, we found some interesting videos, then read a few scientific articles and prepared eye-catching slides for our presentation. Finally, we chose the best slides for the presentation. Then we decided to prepare the Kahoot and preparing it included the information from our presentation.

Comment about the interactive activity in the classroom (at least 400 characters)

Although we were confident about our work and were sure that we had prepared everything in the correct way, at the beginning of our presentation, we felt a bit nervous because it is not easy to speak in front of other students. However, when we saw that other students are listening with interest, we relaxed. Everyone especially enjoyed the Kahoot. During the feedback, other students positively evaluated our presentation, so we felt happy and proud.
