

Students' report Group 19 on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Aiva Saldukaite, Gabija Vasiliauskaite

Class: IIbg

Institute: Domeikava gymnasium

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

It all started when we picked out a topic about soil. We chose this exact subject matter, because of its importance to our planet. Moreover, it is a widely discussed and relevant topic nowadays. There is a lot of information that helped us exhaustively do the project. However, we had difficulties to shorten the information so that it would be clear and accurate to others.

Comment about the activity done at home (at least 300 characters)

We distributed the work at home. Of course, it was extremely hard to work with each other at distance, but we managed it. One of us collected information about the topic that we chose and another one made a presentation with slides. We have carefully re-examined all selected particulars. Then we dispensed the text and recorded our voices, which we later put into slides. Finally, we prepared 10 questions from our presentation and created a Kahoot game.

Comment about the interactive activity in the classroom (at least 400 characters)

We were the first to present our project. Because our presentation was in some way different from the usual slides, we felt a bit nervous that there could be some technical problems. As soon as we started we had the sensation of relief, and the rest of the presentation went smoothly. In our opinion, the overall atmosphere in class notified us about how our classmates were interested and concentrated, they listened

closely to the information we conveyed. To add up, the Kahoot game was terrific, everyone answered most of the questions correctly, but there were still some difficult ones that surprised the majority of the class with their different answers.
