

Students' report Group 3 on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Elvijus Bartkus, Zygimantas Bakanas

Class: IIbg

Institute: Domeikavos gimnazija

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

Our chosen in-depth topic is growing some of my produce. By growing our own fruits and vegetables we ensure that no pesticides and other harmful chemicals reach our produce. We chose to do this because growing our own produce helps to save money and live more sustainably.

Comment about the activity done at home (at least 300 characters)

The activity we did at home was quite simple. First of all, to grow our own produce we needed some seeds, so we went out and bought some tomato and cucumber seeds. After that, we restricted a small area of land in a yard, prepared it for the seeds, and planted them. After countless days of watering these plants, they have almost grown their first tomatoes and cucumbers.

Comment about the interactive activity in the classroom (at least 400 characters)

The interactive activity in the classroom was very informative and enlightening. After listening to all my classmates, we learned about the importance of soil and sustainability in today's climate. This activity also led us to make some changes at home. Some of us started growing our own produce, recycling, and even changed our lightbulbs into LEDs. The activity was also quite enjoyable, because everyone's presentation was different, even though all the presentations were on the same topic.
