

Students' report Group 7

on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Juste Matonyte, Ieva Janaviciute

Class: IIag

Institute: Domeikavos gimnazija

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

We chose to do the class about water pollution because these days' oceans are very polluted, and we wanted to bring attention to it so that people would start the thing about their actions towards our ocean's water quality. And most importantly we tried to bring attention to it in our classroom.

Comment about the activity done at home (at least 300 characters)

First, our entire group made "Messenger group". Then we got together and discussed the workflow. We found a short video called "Plastic in the ocean", and then we reviewed it. We came up with questions from the video along with the answers. In addition, we finally made a "KAHOOT" and introduced it before the class. Everybody in the class tried their best at answering the questions and everybody did great.

Comment about the interactive activity in the classroom (at least 400 characters)

The interactive activity in the classroom was very informative. We presented it to the class and the whole class listened to it with great concentration. Later we showed the slides. The first slide had a very nice title. The second slide was a short video about our chosen topic called "Plastic in the ocean". The class was focused and memorized the information displayed and before the last slide was a kahoot link. All the students came together and started to answer the ten questions in the KAHOOT. The students settled perfectly and at the end of the presentation began to clap their hands. Finally, our deputy director took some pictures during and at the end of the presentation.
