

## Students' report Group 8 on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname:** Livija Zamuškaitė, Emilija Nikitina

**Class:** 10b

**Institute:** Domeikavos gimnazija

**Country:** Lithuania

**Specific in-depth topic of own home study and why this topic has been chosen** (at least 200 characters).

The chosen topic was sustainability, what it means, and the structure of it and how to be more sustainable in everyday life. This topic was picked because we always had interest in learning more about green way of living and how sustainable and clean renewable energy and other advised ways of mindful living actually were.

**Comment about the activity done at home** (at least 300 characters)

Most amount of time we spent trying to find accurate and fitting information, which would be understood easily but also would fully explain the concept of sustainability. More than one source was chosen for it and by comparing one's information with another, the optimal and most credible material was picked for the presentation. In addition, to avoid giving all the information through the text, some of it was left to be said by us during the presentation time or by explaining graphs and pictures included in slides. To be sure, that all our listeners understood what was provided, we prepared a simple quiz, which also tested their general knowledge.

**Comment about the interactive activity in the classroom** (at least 400 characters)

Most of the time we were focused on providing a well put and understandable presentation through slides. We covered questions about what is sustainability, its three pillars, why it is important, how we can be more sustainable and what awaits in the future. In class, we mostly wanted to give as much information as possible

and we found that with approach of mainly us talking we could do it the best within the time limit and without missing any important points. To make all listening people interact and be more included, we made an online quiz through kahoot and got a general insight of how attentive all in the class were and how much they tried to absorb new knowledge.
