

## Student's Personal report

### on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname:** Kristina Babarskaitė

**Class:** IIcg

**Institute:** Domeikavos Gimnazija

**Country:** Lithuania

#### Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

I did it with a friend and we chose soil because it is maybe the least known thing, we learned a lot that soil can die, and all interesting things. I prepared a quiz (Kahoot) and my friend did slides when I did the Kahoot I learned a lot about soil degradation and erosion.

#### Comment about the activity done at home (at least 300 characters)

Everyone could choose the topic they wanted such as the soil, water pollution, water uses. I discussed the topic with my classmate and we chose soil. She introduced the properties of soil in a slide show and I prepared a Kahoot. Working together, we learned a lot about soil. Preparing a kahoot I watched one more video and it helped me a lot to understand the soil and what it consists of, I made a kahoot based on that video. We introduced it in the classroom and everyone was happy.

#### Comment about the interactive activity in the classroom (at least 400 characters)

In the class, we introduced the slides and played a Kahoot. Each presentation was interesting exclusively fun and most enjoyed when we played kahoot because we not only learned something new, but we were able to apply our knowledge. I liked water pollution the most because the presentation was very interesting, easy to understand, and kahoot was fun. During the feedback we decided that we want to have more activities like Flipped classroom in the future.
