

## Student's Personal report

### on E-learning and Flipped Classroom Activities (IO4)

**Student's name and surname: Matas Dikšaitis**

**Class: II cg**

**Institute: Domeikavos Gymnasium**

**Country: Lithuania**

#### **Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)**

I chose the topic of water pollution because I wanted to expand my knowledge on the importance of water in human life and how polluted water affects our environment, as well as all living organisms. This topic seemed very significant and interesting. I decided, I would apply my knowledge based on this topic in the future.

#### **Comment about the activity done at home (at least 300 characters)**

At home, we recycle our waste such as paper and plastic to help nature and avoid pollution. Therefore, I used the ideas from my experience and included suggestions on how to avoid water pollution in my presentation. I also prepared relevant slides and used some data from the videos as well as the articles that I found on the internet. I prepared the presentation with a group of my classmates, so first we shared our responsibilities, then worked individually, later in a group, and finally we made a common presentation.

#### **Comment about the interactive activity in the classroom (at least 400 characters)**

In the classroom, we presented the problem of water pollution. We learned many things on the topic and improved our public speaking skills, as well as our English language skills. We decided that it is very important to take care of our nature and everyone can contribute towards a clean environment by starting with simple things, such as collecting trash after camping in the countryside.
