

Student's Personal report on E-learning and Flipped Classroom Activities (IO4)

Student's name and surname: Oresta Murauskaitė

Class: II c g.

Institute: Domeikava gymnasium

Country: Lithuania

Specific in-depth topic of own home study and why this topic has been chosen (at least 200 characters)

I have decided to talk about water pollution, the danger it poses to nature, and us, and of course, how to stop it. I decided to speak about this subject because water is one of the most important components of life that can easily disappear, taking away all life with it, if we do not protect it.

Comment about the activity done at home (at least 300 characters)

When I decided on the topic I want to talk about, I went to find as much shocking and attention-grabbing information as possible, especially about the fast fashion industry, because my classmates buy a lot of clothing produced by the fast fashion industry and do not even know what damage it brings to nature, especially water. Then I shorten all of the information to the most important points, found some pictures fitting the topic, to keep students' attention on me and to make them memorize information better, then put everything into slides. In addition, in the end, I made a kahoot game with 20 main questions to see how well they memorized all the information, and a little task to encourage them to take action to stop water pollution.

Comment about the interactive activity in the classroom (at least 400 characters)

When I was presenting the slides, my classmates were listening carefully, they seemed very intrigued, were happy to do the homework task assigned by me. The homework task was the following: spreading the message on social media sites, about the damage and effects of water pollution and the ways to reduce or stop it. The

next lesson, because we were short of time, they played kahoot to check what they learned and to revise the things that they did not learn well enough. The results were very good, the first-place winner got 18 out of 20 questions correct, everyone remembered information well, and so in the end the winner was the person that picked the correct answers the fastest. If one of my classmates did not understand why the answer is one and no other, they asked me why it is that way and I made sure to answer each time.
